Urban & Industrial Vector Backgrounds

Modular Environment Pack

Thank you for using **Urban & Industrial Vector Backgrounds – Modular Environment Pack**!

This package contains two stylized vector-based 2D environments designed for use as game backgrounds.

Each environment is provided both as a complete ready-to-use background and as a collection of separate modular elements, allowing you to quickly use the included compositions or create your own custom scenes.

> **Note:** The artwork is created in a vector graphic style, but the included Unity-ready assets are provided as PNG sprites. Editable SVG, AI, or other vector source files are not included.

Package Contents

The package includes two environment themes:

- **Urban City**
- **Industrial Area**

Included Assets

- 2 complete ready-to-use backgrounds
- 2 modular sprite sheets
- 49 individual sliced sprites
- 27 Urban environment elements
- 22 Industrial environment elements
- Demo Scene with the included environment elements
- Transparent PNG sprites where required

Modular Environment Elements

Both environments can be used as complete backgrounds or rebuilt using their individual elements.

The package includes separate buildings, structures, props, industrial objects, and environmental elements.

You can:

- Move individual elements
- Scale them
- Duplicate them
- Change their sorting order
- Combine elements from the environment

- Create your own background compositions

This makes the package suitable both for quickly adding a finished background and for building custom environments.

How to Use

Using a Complete Background

1. Open the `Sprites` folder.
2. Choose the Urban or Industrial complete background.
3. Drag the sprite into your scene.
4. Adjust its position and scale to match your camera.

The complete backgrounds can be used immediately without additional setup.

Creating a Custom Background

1. Open one of the modular sprite sheets.
2. Expand the sprite sheet in the Unity Project window.
3. Select the required sliced sprites.
4. Drag them into your scene.
5. Position and scale the elements as needed.
6. Use Sorting Order to arrange elements into foreground and background layers.
7. Duplicate and combine elements to create your own environment.

Demo Scene

A demonstration scene is included in the package.

It contains the environment sprites arranged in Unity and can be used as:

- A visual reference
- An example of sprite placement
- A starting point for creating your own compositions

The Demo Scene can be found in:

`DemoScenes/`

Technical Information

- **Asset Type:** 2D Sprites
- **File Format:** PNG
- **Artwork Style:** Vector
- **Complete Background Resolution:** approximately 1200 × 364 px
- **Pixels Per Unit:** 100
- **Modular Sprites:** 49
- **Scripts:** None
- **Third-Party Dependencies:** None
- **Tested Unity Version:** Unity 2022.3.62f3

Compatibility

The package has been tested with:

Unity 2022.3.62f3

The assets use standard Unity 2D sprite functionality and do not require additional packages or third-party plugins.

The package can be used in:

- 2D games
- 2.5D games
- Side-scrollers
- Platformers
- Menu backgrounds
- Level backgrounds
- Decorative environment scenes

Folder Structure

`DemoScenes/`

Contains the demonstration scene with examples of the included environment assets.

`Sprites/`

Contains:

- Complete Urban background
- Complete Industrial background
- Urban modular elements
- Industrial modular elements

Customization

The included modular sprites allow you to create different compositions using the same set of assets.

Individual elements can be repositioned, resized, duplicated, layered, and combined to fit different level layouts and screen sizes.

No scripts are required to use or customize the environments.

Support

If you have any questions or encounter an issue with the package, please contact us through the **Unity Asset Store**.

When reporting an issue, please include your Unity version and a short description of the problem.

License

This asset can be used in personal and commercial projects in accordance with the **Unity Asset Store End User License Agreement (EULA)**.

Redistribution or resale of the included asset files as a standalone asset pack is not permitted.

Thank you for using **Urban & Industrial Vector Backgrounds – Modular Environment Pack**!
